

Mitinet™ Library Services

Need to simplify your cataloging? We can help.

Mitinet Library Services helps you manage your MARC records in less time, with a platform that offers the best record source in the business, customizable features, sophisticated automation and extended services that take the burden of updates off your to-do list. *And we do it for less than it costs to do it yourself.*

Whether you catalog for a union catalog of 30 libraries or just one, with Mitinet™ you get the tools and experience to maintain the best MARC record catalog for your patrons. In short, we are your virtual cataloging team - tell us what you need and we do it, quickly & accurately.

➤ **BestMARC™ - Online Database Management Platform**

BestMARC™ is great for any level of cataloger.

Record Source - Unlimited MARC record downloads of any record type - print, E-books, AV and professional and **built-in z39.50** search capability.

Copy Information Editing - Edit records in BestMARC™ to include copy fields customized to match your automation system.

Built-in Cataloging Assistance - Including field specific Tips & Examples, Errors & Warnings and access to cataloging rules for AACR2 and RDA*.

Default Profile Options - Default profile options include cataloging in RDA or unicode and manually adjusting ISBD punctuation.

Database Management Features - See your uploaded and/or cataloged MARC records in list format. Identify errors that need correction and sort items to download or edit individually. Download records in small batches or all at once.

Coming Soon - Global Edits & Workflows - Create, save & share Global Edits with other users in your account. Combine 2 or more edits for even more powerful workflows.

*RDA Toolkit access available only to RDA Toolkit subscribers

Popular Product Highlights

Make cataloging the easiest part of your job with **BestMARC™**

- **BestMARC™** is the most complete collection of K-12 print, AV, professional & e-materials records in the business because we constantly update and maintain our data.
- **Can't find a record?** With one click the **Search More Servers** button finds additional records based on your search criteria. And with every search **BestMARC™** gets better because we add verified rare record results to the database.
- Easily make your records more discoverable with **BestMARC's Subject Explorer**, search for additional Sears, LC and LCAC subject headings by dewey number, LC classification number or subject.
- RDA Compliant and a built-in link to RDA Toolkit (access available to RDA Toolkit subscribers) in our Cataloger.
- **BestMARC™** is available as either a single-site, or district- or consortium-wide subscription. Available services vary depending on your subscription level and database type.

BestMARC™ also makes it easy to train and manage your cataloging team.

We know that cataloging training is a perennial need, but there is rarely the time or money in the budget for live training. BestMARC™ offers real catalog training solutions.

In addition to the built-in features that help catalogers find and fix common errors, easily find appropriate subject headings and offer field specific guidance on appropriate formatting, BestMARC™ offers over **30 material type templates** to get started, a **built-in tutorial** to get users comfortable with the software and a comprehensive **Support Center**, with **slideshow feature reviews** and **online documentation** on how to use our product.

We also offer **Free Product Training webinars**, where we walk you through the features you want to learn about.

Other management tools - The **Account** page helps the Account Manager review account activity, add or update users, and easily view subscription details and service reports. With the shared **Download Center**, a lead cataloger can import records from any user on the account, or from multiple users at once.

With Full Circle Support™ we do the work of updating your database for you, at a fraction of the cost in both time and money. Here's how it works.

- **Full Circle Support™** is an extended service, available to qualified **BestMARC™** customers. For libraries that are part of a Union catalog, all participating sites must have a **BestMARC™** subscription.
- When you sign up select your preferences from the list of enhancement options. We work with you to perform regular data maintenance and manage key aspects of your MARC records database, specifically for information that changes constantly, such as Lexile® and reading program information and national and state awards.
- We work according to your schedule, notifying a predetermined contact when we begin and when we're done.
- Upload a copy of your database to us or give us log-in access to do the work for you. We update and return your data as soon as possible, often within 2-3 business days with a report on what we've checked and changed.

We believe that finding the right thing to read is the first step in being a great reader, and we want to help you make it easy for your readers to do that.

It's what we do best.
